

NEWS BDG : THE LAUNCH OF 2 LIGHTWEIGHT WINGS AND A NOVEL VIDEO ABOUT THE ADAM

THE DUAL LITE AND THE TALA LITE

The R & D team at BGD have been working on a whole new range of wings which are even lighter.

Bruce Goldsmith has now launched the Tala Lite along with the Dual Lite.

Equipped with normal risers, the Dual Lite only weighs 6.35 kg (without the spreaders) and has just gained EN-B certification.

With normal risers, the Tala Lite weighs 4kg, but has still to be certified

THE ADAM CERTIFIED EN-A

The Adam has only 34 cells, but Bruce has maximised the technology, used for the leading and trailing edges. This school glider includes BGD 3D Shaping technol-

The Adam A, a beginner's wing using 3D Shaping technology and mini ribs.

ogy (Cord Cut Billow), as well as mini-ribs on the trailing edge. An unusual amount of effort for an EN-A!

Bruce has just brought out an interesting video about this wing, some of which was filmed from inside the wing during flight...
