

# PINK IS BACK!

In 2014, NOVA celebrates its 25th anniversary. In 1989, the Austrian company manufactured their first wing - the CXC. It was home sewn, bright pink with yellow stabilizers and it had a revolutionary performance compared to the other wings of its time.

To celebrate the company's anniversary, NOVA is getting into the spirit of those wild bygone years, they say, by releasing the ION 3 and MENTOR 3 (25 of each) as a limited edition in retro colours. A visual homage to its legendary ancestor the CXC, with a

pink sail and yellow tips - but packed with the knowledge that they have acquired in 25 years of producing paragliders!

If you would like to get your hands on an exclusive anniversary glider, contact your NOVA dealer without delay. Orders must be received by the 17th of April 2014. Nova have told us that the wings will be delivered by mid-May.
